

Hasko

Heavy-Built Performance

SERVING THE FLOORING, WOODWORKING & MOULDING INDUSTRIES SINCE 1930

Are you ready for “heavy-built performance?” HASKO flooring, rough-mill and woodworking machinery incorporates robust engineering, state-of-the-art 21st Century technology and the industry’s best service and support. Our goal is to ensure that our customers maintain a competitive advantage in a challenging global manufacturing environment.

HASKO has delivered hundreds of machines to customers who demand the ultimate in accuracy, efficiency, productivity and performance. When you buy from HASKO, there is no middleman — you deal directly with the manufacturer. Call us to see how our custom machine solutions and automation expertise can help your company improve yield, reduce labor, and improve efficiencies and output.

HASKO is a world-class manufacturer delivering Heavy-Built performance and innovative solutions.

We specialize in designing and manufacturing heavy-built machines for the following industries:

- Flooring: engineered wood, solid wood, and truck flooring
- Lumber ripping systems
- Moulding industry
- Dimensional wood/furniture
- Laminated beams
- General woodworking

Hasko FSM MATCHMASTER

FLOORING SIDE MATCHER

A Key Machine
in the Complete
Line of Flooring
Manufacturing
Equipment by

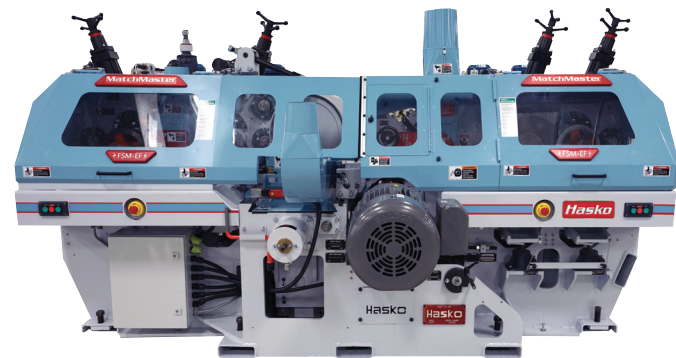

HASKO offers complete solutions for your Solid Wood and Engineered Wood Flooring manufacturing needs.

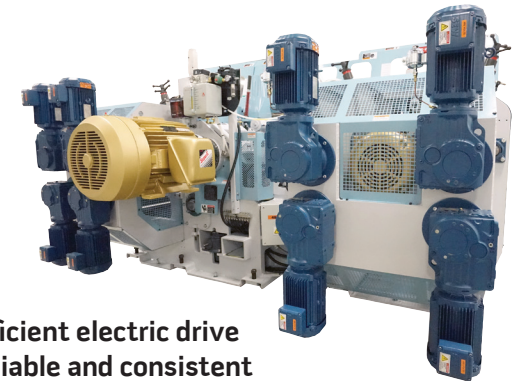

- Rough mill optimizing gang rip system
- HASKAN board scanning and HASKO Automatic Defect saw systems
- HASKO/Mekanika automated material handling systems
- Flooring side matchers and feeders
- Defect scanning and cutting
- EndMatchers
- Packaging solutions

Feed Speeds Available Up to 600'/min

The HASKO FSM "Quick Clear" function allows the operator to stop, open and clear the machine of debris and re-start in less than a minute

FSM-EF with optional
FSP strip surfer

Energy-efficient electric drive
provides reliable and consistent
speed control and performance

FEATURES

- State-of-the-art safety features include door interlocks and zero speed sensing, safety circuitry
- HASKO "Quick Clear" function provides repeat set up for top head and left side head within .002"
- All cutterheads and feed drives are inverter controlled and include braking
- All top feed drives are inverter controlled and include braking
- All top feed rolls and centermatch rollers are raised pneumatically and reposition to exact setup when closed

SPECIFICATIONS

- Shortest material: 10"
- Capacity: 2" x 6" or 2" x 10" optional
- Top head: standard 50 HP
- Bottom head: standard 40 HP
- Side heads: standard left side 30 HP and right side 25 HP
- Hollow back: standard 20 HP
- Cutterhead speeds: standard 3,600 RPM
- Feed drive: standard 150-400'/min
- Feed speed: standard 150-400'/min

OPTIONS

- High-speed side head motors available for speeds up to 6,000 RPM
- Mist lube system for top head, bottom head, and hollow back units for up to 4,800 RPM speeds
- Feed speeds up to 600'/min
- Higher horse power cutterheads for higher speeds required
- Top and bottom cutterheads with up to 16 knives
