

Heavy-Built Performance

SERVING THE FLOORING, WOODWORKING & MOULDING INDUSTRIES SINCE 1930

Are you ready for "heavy-built performance?" HASKO flooring, rough-mill and woodworking machinery incorporates robust engineering, state-of-the-art 21st Century technology and the industry's best service and support. Our goal is to ensure that our customers maintain a competitive advantage in a challenging global manufacturing environment.

HASKO has delivered hundreds of machines to customers who demand the ultimate in accuracy, efficiency, productivity and performance. When you buy from HASKO, there is no middleman — you deal directly with the manufacturer. Call us to see how our custom machine solutions and automation expertise can help your company improve yield, reduce labor, and improve efficiencies and output.

We specialize in designing and manufacturing heavy-built machines for the following industries:

- Flooring: engineered wood, solid wood, and truck flooring
- Lumber ripping systems
- Moulding industry
- Dimensional wood/furniture
- Laminated beams
- General woodworking

HSSM - HIGH SPEED SIDE MASTER

HSSM HIGH SPEED SIDE MASTER

When the engineers at HASKO developed the HSDC-X2 Extra Chopsaw, our goal was to create one of the best machines in the world for processing rough or planed hardwood and softwood. The Extra is an automatic chopsaw designed with independent saws that operate 10-15% faster than most single-saw machines.

Weight: 12,275lbs (estimated)

Side Heads

- Left Side Head: 30HP, - Direct Driven via Perske Motor
- Right Side Head: 30HP, - Direct Driven via Perske Motor
- Spindle RPM: Up to 4800
- Spindle Diameter: 1-13/16" diameter smooth finish for Hydro-Loc
- Cutting Circle: Left Side 9'00" maximum & Right Side 9'50"
- Locking Hydraulic
- Tensioning Pneumatic

Feed Works:

Feed Rolls: (Six) X 8" diameter driven rolls
In-Feed: Two Top Chromed/Knurled Rolls and Two Smooth Bottoms
Out-Feed: One Top Chromed/Knurled Roll and One Smooth Bottom
Drive System: 3 HP SEW Gear Drives and splined universal shafts
Feed Speeds: 150-300 FPM or 300-550 FPM

ZFS

- FG(F)FB)ZSB MD"DBES
- FOES.BDI)PXPX010 F BDZØFS
- 5PQOGFF3P)OF BD ZØFS
- 5PQOGFF3P)OFBU DZØFS

Voltage:

- 460/60/3 (standard)
- 230/575 VAC (optional)

Order Options:

Proposed side heads

Amount of Cut:

Maximum side head: 0 250
Minimum side head: 0 500"
